## **DPT Laboratories names Lyle Flom Vice President of Development & Commercial Services**

**SAN ANTONIO** – DPT Laboratories announced today that Lyle Flom has been named Vice President of Development & Commercial Services.

Flom, who joined DPT in 2001, previously was general manager for Plant Operations in San Antonio. In his new role, he will oversee product development activity, as well as ongoing commercial production for customers of DPT.

The move is part of an internal restructuring in which the company will put increased emphasis on merging divisions and services that are closely related. Grouping Development & Commercial Services under Flom's direction will result in customer support personnel working side by side under one division.

“Merging these two departments under one reporting structure will further enhance DPT's commitment to providing a team approach to customer service,” Flom said.

The combined division will support the company's Centers of Excellence, which DPT recently established for liquid and semi-solid products in San Antonio and for sterile production in Lakewood, N.J.

Flom began his career at DPT as a finance manager and was promoted to director of finance/plant controller in 2003. He was named senior director for Plant Operations in San Antonio in 2006, prior to becoming general manager of Plant Operations. Flom holds a bachelor's degree in business administration from the University of Texas at San Antonio. After graduation, he pursued and achieved certification as a CPA.
