DPT to promote expanded aseptic manufacturing capabilities at PDA Meeting

SAN ANTONIO – DPT Laboratories, a contract development and manufacturing organization, announced today the company will showcase its aseptic manufacturing capabilities at the Parenteral Drug Association (PDA) annual meeting's Exhibit Hall on March 15-16, 2010 in Orlando, Fla.

This year's PDA meeting theme of "Manufacturing Excellence," aligns well with DPT's overall philosophy and commitment to customers. The company's aseptic manufacturing capabilities comprise a wide range of sterile dosage forms including small volume parenterals, ophthalmic preparations, nasal sprays, and sterile ointments. DPT is suited to provide comprehensive solutions from a state-of-the-art facility to meet customer needs for clinical and small to mid-size commercial batches.

DPT's capabilities for sterile products include:

- Comprehensive development services
- Manufacturing process development
- cGMP manufacturing of CTM (clinical trial material) and commercial product
- Sterile component preparation
- Aseptic filling capabilities for:
 - Vials: 2mL – 50mL
 - Micro-dose Vials: 0.125mL – 0.240mL
 - Pre-filled syringes: 0.5mL – 3.0mL
 - Tubes: 3 g to 30 g

To learn more about DPT services, schedule a meeting at PDA or call 210-396-5044.

###

About DPT Laboratories

DPT is a contract development and manufacturing organization (CDMO) providing companies the best solutions to their sterile, semi-solid and liquid drug development and manufacturing needs through innovation, technology, and service. Specializing in semi-solid and liquid dosage forms, DPT has a reputation for quality, unmatched technical expertise, extensive manufacturing capabilities, and an exemplary regulatory compliance record. With five cGMP facilities in San Antonio and Lakewood, N.J., DPT offers full service outsourcing solutions including pharmaceutical development, site transfers, state-of-the-art manufacturing, packaging, and worldwide distribution.
