DPT Laboratories invests \$15 million in its newly-restructured Center of Excellence in San Antonio, Texas

SAN ANTONIO, TEXAS – [DPT Laboratories, Ltd.](#), a pharmaceutical contract development and manufacturing organization, has completed a \$15 million-dollar investment at its 450,000 sq. ft. [Center of Excellence for Semi-solids & Liquids in San Antonio, Texas](#).

The new expansion gives DPT a substantial increase in capacity to its bulk manufacturing and packaging areas to support increased production demands. The majority of infrastructure expansion includes two bulk manufacturing areas and the addition of three manufacturing production filling lines. Other enhancements include the addition of clinical scale manufacturing capability for pressurized metered dose inhalers (pMDI), lighting options for light-sensitive materials and advanced air filtration and handling.

“The most important element of this investment has been our ability to better serve customers with high-speed, cost-effective manufacturing runs,” said Mark Fite, DPT Vice President of Operations. “These enhancements reinforce our commitment to our customers of being a one stop CDMO providing a full spectrum of manufacturing capabilities from clinical and development projects through to full scale production.”

This center provides cGMP pilot, clinical and commercial scale manufacturing for prescription and over-the-counter products. The San Antonio center also includes a dedicated 60,000 sq. ft. cGMP aerosol and pMDI manufacturing facility, a 225,000 sq. ft. raw material dispensing and distribution center and a 150,000 sq. ft. compounding, fill and finish area.

DPT has long maintained a position as the leading provider of pharmaceutical development and manufacturing services for [semi-solid and liquid products](#). The recent facility

expansion demonstrates the company's ongoing investment in providing quality, efficient service to its customers.

"As DPT continues to grow, we always seek opportunities to increase efficiencies," Fite added. "This investment provides us with expanded capacity, capabilities and ultimately more flexibility for our customers."

The company recently announced a strategic shift creating Centers of Excellence, each focusing on a specific area of expertise. The [Semi-solids & Liquids Center of Excellence](#) in San Antonio will focus on prescription and OTC products. Aseptic manufacturing services will be provided at the [Center of Excellence for Sterile & Specialty Products](#) in Lakewood, N.J. and the [Center of Excellence for Research & Development](#) in San Antonio will provide pharmaceutical development support for both manufacturing locations.

DPT employs more than 600 personnel at its San Antonio locations. "DPT's strongest asset has always been our team of knowledgeable scientists, highly-skilled technicians and dedicated support personnel," Fite said.
