DPT Laboratories names Jason Vaughn Director of Formulation Development

SAN ANTONIO – DPT Laboratories announced today that Jason Vaughn, Ph.D. has been named Director of Formulation Development.

Vaughn previously was Vice President of Operations at PharmaForm, LLC, in Austin, Texas. At PharmaForm, he was responsible for the management of platform R&D activities and intellectual property and subsequently managed GMP manufacturing, quality control and project management.

“Jason brings a breadth of experience to the R&D team,” said Frank Sorgi, Vice President of R&D. “His experience in drug development, analytical method validation and knowledge of metered-dose inhalation enables him to enhance our continuum of services.”

Vaughn will oversee pre-formulation development, formulation development and commercial support activities to include raw material sourcing, API compatibility with excipients, stability of API and factors affecting stability, method development and transfer, API characterization, formulation and packaging compatibility, informal stability/formulation stress testing, antimicrobial effectiveness testing, rheology/viscosity, and formulation container closure compatibility assessment.

Vaughn began his career as an Associate Director of Analytical Research and Development and Product Development at PharmaForm. He holds a bachelor’s degree in pharmacy and a Ph.D. in pharmaceuticals from The University of Texas.
