## **DPT Announces VESPA Sweepstakes winner** *Company gives away economical scooter at national conference*

SAN ANTONIO (January 7, 2009) – DPT Laboratories, Ltd., a contract development and manufacturing organization, announced today that Soo-il Kim, Senior Manager with Sanofi-Avetis, is the winner of a red, 2009 LX-150 VESPA. Kim was chosen from more than 500 entries both online and at the 2008 American Association of Pharmaceutical Scientists Annual Meeting and Expositions in November.

"I am happy to win the VESPA scooter and thank DPT Labs for its generosity. I hope 2009 will be a lucky one, as well," Kim said.

DPT officials said the VESPA, with its sleek, efficient design and long, respected history, was a great pairing with DPT's efforts to position the company as a long-standing yet innovative and unparalleled outsourcing solution for semi-solid and liquid development and manufacturing. As VESPA has been capturing market share of the growing scooter sector, DPT continues to grow and increase revenue each year as a contract development and manufacturing organization.

"We were excited to offer the VESPA as this year's sweepstakes prize and glad Mr. Kim will enjoy a new way of getting around this year," said JJ Feik, DPT director of marketing & corporate development. "The VESPA fits well with DPT's efforts to promote our history and commitment to quality and efficiency. It was a great way to end our 70th anniversary year."

The giveaway was publicized at various trade shows that company representatives attended last year, promotional mailers and through customer email notifications. Kim was selected in December 2008 and will receive the scooter in January.
