

**PROOF IN EVERY
PRODUCT**

Proven Excellence in Semi-Solids and Liquids

ABOUT DPT

As the leading contract development and manufacturing organization (CDMO), DPT, a Mylan company, is recognized for our expertise in semi-solid and liquid dosage forms, with an established legacy of excellence dating back more than 80 years.

More than any other CDMO, we understand how scale-up will be interwoven from your research and development project into full-scale commercialization, offering close consultation throughout your product's life cycle. From pre-formulation to commercial manufacturing, you only need one partner to streamline your path from lab to market: DPT does it all.

You won't have to look far for measures of success
— the proof is in every product.

500+ NDA, ANDA, NADA, AND OTC SKUS
brought to market over the last 25+ years

a Mylan company

OUR CAPABILITIES

PROFESSIONAL SERVICES FOR SEMI-SOLIDS AND LIQUIDS

Trust the CDMO that's proven time and again that we build momentum from concept to commercialization.

DEVELOPMENT

Development process support

Our scientists pair pharmaceutical formulation development expertise with innovative process development and advanced technologies to identify and implement full-service development solutions, including:

- Pre-formulation and formulation
- Analytical development and validation
- Process development and validation
- Stability studies: ICH and custom
- Clinical trial material manufacturing
- *In vitro* release testing expertise
- Quality by Design

Whether you're formulating a new product or optimizing or transferring an existing drug, DPT has expertise in a wide range of semi-solid and liquid dosage forms, including:

- Aerosols
- Creams
- Emulsions
- Gels
- Lotions
- Ointments
- Solutions
- Suspensions

MANUFACTURING

Scale-up, commercial production, and packaging

DPT is the go-to source for everything from small pilot batches to large-scale manufacturing, and from clinical trial materials to full-scale commercial cGMP production. Access the comprehensive capabilities you need, including product packaging innovations that increase production efficiencies. DPT is the ideal partner for your entire program, from manufacturing to packaging.

- Semi-solids and liquids
- Aerosol foams and sprays
- Site and technology transfers

SPECIALIZED CAPABILITIES

- Cytotoxic
- Hormones
- XP solvents
